CYCALONA VILLANI

Full Stack Software Engineer | QA & Test Automation | Technical Delivery

McAlester, OK • Open to remote U.S. roles / Indiana • 469-929-8777 • clonievillani@gmail.com

Portfolio: https://cycalona-villani.github.io/cycalona-portfolio/

PROFESSIONAL PROFILE

Full stack developer and software delivery professional with enterprise project experience supporting AT&T, Southwest Airlines, and Lumen. Build and support web applications across React, Angular, Vue, JavaScript/TypeScript, APIs, and databases. Partner with software architects to implement technical solutions; coordinate distributed developers, review code, investigate blockers, and validate functionality before formal QA. Equally interested in full stack engineering and hands-on manual/automated quality assurance.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Angular, Vue.js (1 & 2), HTML, CSS

Data & services: Backend API integration, SQL Server, MySQL, PostgreSQL, MongoDB

Quality & delivery: Manual functional testing, regression testing, defect investigation, code review, Cypress, Jenkins CI/CD, Git, GitLab, Agile/Scrum

Platforms & tools: AWS/Azure environment support, SharePoint, Power Automate, Power Query, Power BI

PROFESSIONAL EXPERIENCE

Program Assistant / Timekeeper & Systems Support — McAlester Army Ammunition Plant, OK / ***Dec 2024–Present***

- Support automated timekeeping and operational reporting workflows across Public Works teams, investigating data discrepancies and coordinating corrections.
- Build and maintain SharePoint/Power Automate processes and Excel/Power Query/Power BI reports; gather requirements, test improvements, and document workflows.
- Develop Power BI dashboards and Excel-based tracking to give supervisors visibility into training, labor, workload, and compliance status.
- Validate records, investigate exceptions, and test updates to reporting and appointment-tracking workflows before use by teams.

Full Stack Developer / Software Developer — Chord Studios, Richardson, TX / ***Intermittent engagements beginning 2016; most recent 2023–2024***

- Contributed to enterprise software initiatives involving AT&T, Southwest Airlines, and Lumen; responsibilities varied by project and client.
- Developed and supported web application functionality using JavaScript, React, Angular, Vue, and integrations with backend APIs and relational/NoSQL databases.
- Worked directly with software architects to translate technical decisions into implementable work; coordinated tasks with onshore and offshore development teams.
- Reviewed developers' code, investigated issues blocking implementation, and helped resolve integration and application problems.
- Performed hands-on functional validation and pre-QA reviews to identify issues before formal quality assurance; supported testing, deployment, and maintenance.
- Supported AT&T IoT integrated-solutions work involving device-related initiatives such as headsets, phones, and smart TVs, collaborating across multiple development work streams.
- Partnered with client stakeholders to clarify requirements, troubleshoot delivery risks, and validate implemented solutions across changing project priorities.

Software Analyst — Nityo InfoTech (Lumen Technologies client) / ***Nov 2021–Apr 2023***

- Diagnosed application, configuration, network, and infrastructure issues using logs, diagnostics, and cross-team investigation.
- Supported AWS and Azure environments, Jenkins deployment troubleshooting, testing, maintenance, and technical documentation.
- Coordinated problem resolution with developers and infrastructure specialists, documenting findings, workarounds, and next steps for repeatable support.
- Validated changes and investigated issues following deployments to help maintain application reliability.
- Supported cloud connectivity and access troubleshooting across application and infrastructure layers.

Product Owner — Dialectic Applications, Inc. / *Aug 2020–Nov 2021*

- Translated stakeholder needs into user stories and delivery priorities; maintained Agile backlogs and coordinated requirements with engineering teams.
- Supported acceptance testing, issue resolution, and release readiness through documentation and stakeholder feedback.
- Worked with developers and stakeholders to clarify acceptance criteria and determine whether delivered functionality met business needs.
- Organized and prioritized incoming changes, defects, and enhancement requests to help teams focus on high-value delivery.
- Documented decisions, requirements, and process changes to support handoffs and ongoing application improvements.

Web Developer Coordinator — Advanced Sports Eyewear / *Feb 2016–Aug 2016*

- Supported UI implementation, e-commerce planning, HTML/CSS templates, software migration, and testing against company standards.
- Assisted with updates to web interfaces and templates, coordinating implementation details and identifying layout or functionality issues.
- Tested new and modified code against expected behavior and company standards before release.
- Provided troubleshooting and technical guidance to internal users, including the sales team.

Freelance Software Support — HailStrike / *Jan 2012–Feb 2016*

- Delivered customer-facing technical support, application documentation and demonstrations; coordinated development requests and deadlines.
- Created and maintained product and support documentation to help customers understand application workflows.
- Gathered user issues and enhancement requests, relaying actionable details to developers and tracking follow-up.
- Supported software demonstrations, user training, and earlier CRM setup and data-backup activities.

SELECTED PORTFOLIO PROJECT

Provider Verification System | React, TypeScript, Cypress, Jenkins, CI/CD

Demonstrates frontend implementation, provider-verification workflow design, automated browser testing, and a continuous integration workflow. Project available through portfolio link above.

EDUCATION & PROFESSIONAL DEVELOPMENT

Certificate in Full Stack Web Development — Southern Methodist University, Dallas, TX (2019)

ScrumMaster (CSM) and Scrum Product Owner (CSPO) certifications earned in 2023
